Remote Controller Setup Instructions

A CAUTION

- 1. No switch box or staple is supplied. Prepare them locally.
- 2. No remote controller cord is supplied. Prepare the optional remote controller cord (4 wire).
- 3. Be sure to turn off the power to any apparatuses connected prior to mounting.
- 4. To prevent damage caused by static electricity, remove static electricity from your body by touching a nearby metallic part (doorknob, aluminum sash window, etc.) prior to mounting. Also, do not touch the remote controller board or adapter board directly.
- 5. Keep the wiring away from any other power source lines to avoid electric noise (external noise).
- 6. Select a flat surface, wherever possible, to mount the remote controller. To prevent deformation of the cases, do not overtighten the mounting screws.

1. Securing the remote controller lower case

Insert a bladed screwdriver into the concave (凹) in the remote controller lower case to remove the upper case assembly (two locations).

The remote controller board is located on the upper case. Take care not to scratch the board with the screwdriver.

 Exposed mounting Secure the remote controller lower case with the two supplied wood screws.

(2) Embedded mounting Secure the remote controller lower case with the two supplied machine screws.

For the field supplied switch box, use optional accessories KJB1111A or KJB2121A.

2. Securing the remote control adapter

(Mounting with supplied wood screws)

(Mounting with supplied double-face adhesive tape)

3. Wiring

Remote control adapter (attached)

4. Placing the upper case assembly of the remote controller and the upper case of the remote controller adapter back in position
